Dear Ladies and Gentlemen! In light of my interest in professional development and my desire to enhance my knowledge and skills in the field of accounting in Poland, I would like to apply for the position of accountant. I am eager to take on new professional challenges and gain experience in the area of the Polish accounting system, which I consider to be a step forward in my professional career.

I am an independent accountant with a higher education in economics, having 5 years of experience in Belarusian accounting and 8 years of experience in the field of taxation. My previous professional experience was gained in Belarus as a tax inspector and as an independent accountant.

While working at the tax office, my main responsibilities included conducting tax audits for legal entities. Monitoring, controlling, and verifying the correctness of the business activities of legal entities allowed me to gain an in-depth understanding of accounting, tax, and administrative law in practice. In this position, I developed qualities such as responsibility, the ability to work effectively in a large team, working under time constraints and multitasking, as well as the ability to make effective decisions. I received awards for professionalism and high achievements, awarded to me twice by the head of the tax service.

As an independent accountant, I managed the full accounting in a limited liability company, which included:

Since 2022, I have been living in Poland and have a temporary residence permit with access to the labor market. I am interested in professional development as an independent accountant, and later as a chief accountant in Poland. In order to successfully achieve this goal, I have completed courses in accounting (Level I) at the Association of Accountants in Poland, and I am continuing my education in the second degree program (independent accountant). Additionally, to better understand the Polish legislation, I am currently studying Administration at the Cosinus vocational school.

One of the main conclusions I have drawn from my experience is understanding the importance and necessity of self-education, continuously improving my skills, and regularly monitoring changes in legislation. I am convinced that these skills will help me develop my knowledge and professional skills in the field of accounting and tax accounting in Poland.

In addition to developing my professional qualifications, I also strive to broaden my interests and personal skills. Therefore, being interested in programming and web development, I participated in a training course in the Java Script programming language. These skills allow me to move smoothly between different types of activities and contribute to the development of thinking in various directions.

Based on the above, I am confident that I meet your qualification criteria. If my candidacy has piqued your interest, please review the details of my CV, which can be found on the website <https://vicbelova.com>. I would be happy to present myself in person during the interview.

With respect, Victoria Belova
